# Registered Professional Nurse Job Description Adult Intermediate Care

### **Job Summary:**

The Adult Intermediate Care RN is responsible for managing the care of the adult and elderly patient experiencing severe, but usually non-life threatening problems requiring moderately complex assessment, moderately intensive therapies and interventions, and moderate levels of nursing vigilance. The Adult Intermediate Care RN is responsible to the Clinical Manager for assigned Intermediate Care/Progressive Care Unit.

#### Qualifications

- Current licensure in good standing in the state of practice
- Evidence of 1 year of adult intermediate care nursing experience within the past two years
- Evidence of BLS credential mandatory; additionally, the RN may have resuscitation credentials, including but not limited to ACLS
- Additionally, the RN may have professional certifications, including but not limited to CCRN

## Responsibilities

- Conducts an individualized patient assessment, prioritizing the data collection based on the adult or elderly patient's immediate condition or needs within timeframe specified by client facility's policies, procedures or protocols.
- Conducts ongoing assessments as determined by the adult or elderly patient's condition and/or the client facility's policies, procedures or protocols and reprioritizes care accordingly.
- Develops plan of care that is individualized for the adult or elderly patient reflecting collaboration with other members of the healthcare team.
- Performs appropriate treatments as ordered by physician in an accurate and timely manner.
- Performs therapeutic nursing interventions as established by individualized plan of care for the adult or elderly patient and his/her family.
- Provides individualized patient/family education customized to the adult or elderly patient and his/her family.
- Documents patient assessment findings, physical/psychosocial responses to nursing intervention and progress towards problem resolution.
- Initiates emergency resuscitative measures according to adult resuscitation and advanced life support protocols.
- Maintains confidentiality in matters related to patient, family and client facility staff.
- Provides care in a non-judgmental, non-discriminatory manner that is sensitive to the adult or elderly
  patient's and family's diversity, preserving their autonomy, dignity and rights.
- · Reports patient condition to appropriate personnel during each shift.
- Maintains current competency in adult intermediate care nursing.
